Professional Profile

Enthusiastic undergraduate second year student specializing in Cyber Security with a desire to learn new technologies. Focused on acquiring relevant professional experience and developing deeper skills through practical work. Active participant with strong communication skills dedicating impactful contribution to teamwork and innovative projects.

Education

JUNE 2024-2028 — Undergraduate BSc(Hons) in Cyber Security
Sri Lanka Institute of Information Technology

2020 – 2023 — G.C.E A/L Batemulla National School

2015-2020 — G.C.E O/L Batemulla National School

Certifications

2024 — Certificate in General English - British Council

2025 — Introduction to Cyber Security – Cisco Networking Academy
https://www.credly.com/badges/7b44a317-5f5d-4a15-9f0b-0f8b11f5bf6f/public_url

2026 — Ethical Hacker - Cisco Networking Academy
https://www.credly.com/badges/7c426c40-d4d6-47e6-a19b-ca3e1be742f6/public_url

SKILLS

Technical Skills

- **Languages & Databases:** Java, Python, C, MySQL
- **Security Tools:** Burp Suite, OWASP ZAP, Nikto, sqlmap, Nmap, Aircrack-ng, Wireshark, Beef, Hydra
- **Operating Systems:** Kali Linux, Ubuntu, Linux administration (process control, signals, shell scripting)
- **Other Tools:** Git, IntelliJ IDEA, VS Code, VM(virtualization)
- **Concepts:** TCP/UDP networking, web application security, cryptography (SHA-256, symmetric/asymmetric), CIA triad

Soft Skills

- Strong verbal and written communication skills in both English and Sinhala.
- Analytical problem-solver — comfortable working through complex security and programming challenges
- Self-motivated learner who actively practices ethical hacking and penetration testing outside of coursework.
- Collaborative team player with experience in group-based software and network design projects.

PROJECTS

Secure Multiprocessor TCP Server | C / Network Programming
(https://github.com/it24102325/Secure-Multiprocessor-TCP-Server)

- Built a concurrent TCP server in C with fork-based multiprocessing and a custom binary framing protocol.
- Implemented salted SHA-256 password hashing, session token authentication, rate limiting, and brute-force lockout.
- Delivered a matching Python client with full protocol support, error handling, and audit logging.

Detect Student Depression AIML project | Python / Machine Learning
(https://github.com/it24102325/Detect_Student_depression_AIML_project)

- Designed and implemented multiple machine learning models for predictive analysis and pattern recognition.
- Performed data cleaning, transformation, and feature engineering using NumPy and Pandas
- Applied supervised and unsupervised learning algorithms including regression, classification, and clustering.
- Explored deep learning and NLP techniques for real-world problem scenarios.

Car Rental Web Application | Full-Stack (PHP / MySQL / JavaScript)
(https://github.com/it24102325/car_rental_site)

- Designed and developed a responsive car rental platform with user-friendly booking and vehicle browsing features.
- Implemented server-side logic using PHP and integrated a MySQL database for managing customer data and rental transactions.
- Developed interactive front-end components using HTML, CSS, and JavaScript to enhance user experience.

Movie Rental & Review Platform | Full-Stack Web Application
(https://github.com/it24102325/Movie_rental_and_Review_platform)

- Designed and developed a movie rental and review system supporting user registration, authentication, and personalized interactions.
- Implemented movie browsing, search, and filtering functionalities with detailed metadata and user-generated reviews.
- Developed server-side logic using PHP and integrated a MySQL database for managing rental records, user data, and reviews.
- Enabled rating and feedback mechanisms to enhance user engagement and content evaluation.
